# TOURING CARS JUST GOT REVVED UP

TOCA 2 is the follow up to "The best racing game of the year"

Awarded by the readers of Official PlayStation Magazine

7 new sports cars in the support car championship

Particle explosions, smashing glass and spectacular crash damage

Improved car handling and a new hi-res graphics engine

- All the official 1998 BTCC teams, cars and tracks - including Silverstone, Brands Hatch and Donington
- An additional 9 international tracks and 7 extra sports cars including Jaguar XJ 220, Formula Ford and TVR Speed 12
- Full Championship\*, Arcade Style Challenge, Time Trial, Single Race, Support Car Championship\*, Multi-Player and Link-up modes all available
- \* - Memory card recommended
- Hi-res graphics (512x256), remodelled tracks and real-time lighting for maximum authenticity
- Real pit stops, car set-up options and weather that changes during the race, all give added depth and strategy
- Multiple difficulty levels to give accessibility to newcomers and to challenge experts

HeadCam™ view with fully functional dashboard

1-2 Player Split Screen or 1-4 Player in Link-up mode

Supports steering wheels, digital and analog controllers

## **TOCA Touring car**

The British Touring Car Championship (BTCC) is one of the most exciting motor racing competitions in the world, where mass production four-door 2-litre cars take-on each other in a rough and thrilling series of races. The touring cars conform to a strict set of rules, with revs limited to 8,500 and a mechanical gearbox.

Carefully replicated within **TOCA 2** the 1998 season BTCC rules have been changed to include a short 'sprint' race and a longer 'feature' race, which includes a compulsory pit stop to intensify the action!

Alongside the main BTCC event, there are a variety of support car events which take place during the race day, where drivers compete in identical cars for tight, competitive racing. Several of these support cars are included in **TOCA 2** alongside some specially designed ones.

## **Getting started**

It is advised that you do not insert or remove peripherals or Memory cards once the power is turned on.

Set up your **PlayStation** as described in the **PlayStation** Instruction Manual. With the power OFF, open the Disc cover and insert the **TOCA 2** disc.

If you wish to load or save information during play, insert a Memory card, with at least 1 free Memory card block in Memory card Slot 1. See the 'Memory card' section later in this manual for more details. Close the Disc cover before turning the power on.

## ***driving controls***

The default configuration for the Controller is as follows:

### ***other controllers***

The following types of controller are supported within the game:

**Analog Controller (Dual Shock),  
neGcon, MadCatz wheel,**

The configuration of these can be set-up in the Controllers setup in the Game Options menu.

#### **Configure buttons**

The Configure buttons option allows you to change the default controls to suit your driving style.

#### **Sensitivity**

The sensitivity setting applies to both digital and Analog Controllers and adjusts how much you have to move the Controller to get full lock, whilst steering the car.

## Calibrate

The Calibrate option applies to Analog Controllers, except the Analog controller (Dual shock) which does not require calibration. You will be asked to leave the Controller in its default position, then calibrate the Controller for Left, Right steering, Braking and Acceleration.

## Analog controller (Dual Shock)

**Note:** The Analog Controller should be set to Red mode using the ANALOG mode switch.

## NEGCON

Look Left and Right in HeadCam mode

## madcatz wheel

Note: the handbrake can only be used in Challenge mode and Time Trial Pursuit mode.

## *The in-game display shows you the following information:*

**Current lap  
+ Total laps**

**Time of nearest  
car behind  
and in front**

**Position**

**Speed + Revs  
+ Gear**

## **entering your name**

For all play modes, each player is asked to enter their name. This name is used throughout the game and stored for any records or high scores achieved. A name can be up to 9 characters in length.

## Language select

Please select your preferred language, you have the choice of English, French or German.

## MAIN MENU

When navigating the menu systems pressing the X button will select the highlighted option. Pressing any of the Directional buttons will change the highlighted option. Pressing the Δ button at any stage will move you back to the previous menu.

**The options available at the main menu are:**

**Start Race:** takes you to the game mode selection

**Game options:** Allows you to alter graphics, sound and Controller options

**High Scores:** View the record times and points totals for each game mode

**Information:** Check up on all the cars, drivers and tracks for the 1998 season

**Load Data:** Allows you to load your settings and high scores from Memory card

**Save Data:** Save your settings and high scores to Memory card

## START RACE

**Championship:** Race through an entire season (1/2 player)

**Challenge:** Arcade style checkpoint based competition (1/2 player)

**Support Car Championship:** Race in 7 different support car events

**Single Race:** Race on any single track against the computer cars

**Time Trial:** Try to achieve the fastest time on any track (1/2 player) or play time-trial challenge / 2 player pursuit

**Link-up Game:** Lets you link 1 Console to another for up to 4 player games

**Test Track:** Lets you drive around a multiple route test track to try out different cars and setups

## CAR SET-UP SCREEN

The car set-up will appear at the start of all races in all the game play modes except for 'Challenge'. Below is the car set-up screen.

**Qualify:** Start the qualifying session for the next race.

**Start Race:** Start the next race. Your grid position will be decided by your finishing position during qualifying. If you have gone straight to the race without qualifying then you will be placed at the back of the grid.

**Change set-up:** This option allows you to change set-up of your car:

**Brake Balance:** Alter the balance between front and rear brakes.

**Downforce:** Change the amount of downforce which improves grip, but increases your car's air resistance

**Gears:** Alter the gear ratios, a trade off between better acceleration and higher top speed

**Suspension:** Alter suspension to make it harder or softer on each wheel

**Default:** Reset all settings to the default

**Load set-up:** Load a pre-saved car set-up

**Save set-up:** Save your current car set-up

## **championship**

The rules have changed for the 1998 season of the TOCA Touring Car Championship. The race meeting structure is now Qualifying - 'Sprint' race, Qualifying - 'Feature' race.

Both of the qualifying sessions are now just one lap in length with a rolling start. Your fastest time from each session will determine where you are placed on the grid for each race. You can skip the qualifying session at any time by selecting the 'End Qualify Session' option from the pause menu.

### **'sprint' race**

This is approximately 25% shorter than the 1997 race and therefore it is much more important to get as high a grid position as possible.

### **'Feature' race**

The feature race is approximately 25% longer than the 1997 races and also now includes a compulsory pit stop. This must be taken between 15% and 75% of the race distance and a tyre change must be made.

## ***Pit stops***

Once the car enters the pit lane the computer takes control of your car and drives it to your pit crew. Once the car comes to a halt the pit stop commences. You can select the type of tyres to change to and also any damage incurred prior to the pit stop can be fixed, although this will take extra time.

## ***Starting the championship***

Once selecting the championship mode you are presented with the choice of starting a new game or loading an old game. Selecting a new game brings up the following menu:

**Players:** 1 player or 2 player team

**Difficulty:** Novice/Standard/Expert

**Continue:** Move on to the enter name screen

After entering your name you arrive at the following menu:

**Car Colour:** You only get this option if you are choosing a support car

**Auto/Manual:** Selects automatic or manual gears

**Select Car:** Choose a car to race the championship with

**Continue:** Race

The season has 13 meetings in the order listed below:

Round	Venue
Rounds 1&2	Thruxton
Rounds 3&4	Silverstone International
Rounds 5&6	Donington Park National
Rounds 7&8	Brands Hatch Indy
Rounds 9&10	Ulton Park Fosters
Rounds 11&12	Donington Park National
Rounds 13&14	Croft
Rounds 15&16	Snetterton
Rounds 17&18	Thruxton
Rounds 19&20	Knockhill
Rounds 21&22	Brands Hatch Indy
Rounds 23&24	Ulton Park Fosters
Rounds 25&26	Silverstone International

To progress to the next round you must score 15 points at each race meeting. In Novice mode you will race at only the first 6 venues, in Standard mode you will race at the first 9 venues, and in Expert mode you will race at all 13 venues.

## ***Championship points system***

Pole Position	1pt
1st	15pts
2nd	12pts
3rd	10pts
4th	8pts
5th	6pts
6th	5pts
7th	4pts
8th	3pts
9th	2pts
10th	1pt

## ***The cup system***

Cups are awarded throughout the Championship season after every race, based on your performance. If you perform well enough you will be given secret cheats for the game.

## **2 Player team Championship**

This game is basically the same as the single player except that both players drive for the same team. The goal is for the 2 players to win the constructors championship by working together through the season. However, the players will both be striving to win the drivers championship. To progress to the next round a total of 22 points combined must be scored.

## **Dangerous driving**

TOCA, the governing body of the Auto Trader RAC Touring Car Championship, will not tolerate dangerous driving. If you are judged to have driven into a fellow

competitor deliberately, you may be penalised with a dangerous driving warning.

Penalty points will be deducted at the end of each race, you will not lose any points that you have already accumulated. Penalty points which cannot be deducted from the current meeting will not be carried forward to future races. Dangerous driving penalties only apply in Championship races.

Warnings	Penalty
3	2 Points
4	4 Points
5	8 Points
6	Disqualification on finishing

## **challenge**

This mode is very similar to arcade type racers where your objective is to get as far as you can in the series of 2 lap races, by reaching each checkpoint before your allotted time runs out. The player will start at the back of the grid at each race. The race structure is different depending on the difficulty level selected:

### **novice**

Snetterton  
Silverstone International  
Brands Hatch Indy  
Donington Park National

### **standard**

Silverstone International  
Brands Hatch Indy  
Donington Park National  
Oulton Park  
Croft

### **expert**

Brands Hatch Indy 🏆  
Donington Park National  
Oulton Park Fosters  
Croft  
Thruxton  
Knockhill

## SUPPORT CAR CHAMPIONSHIP

This play mode allows the player to race in many of the support events that are held on TOCA Touring Car weekends - as well as some that we specially created!

The support car championships are raced by a **field of 10 cars**. All the cars that race are the same make, model and performance, the only differentiation being the colour of the cars bodysHELLS.

Each of the championships will be raced over 4 meetings. Each meeting includes a 1 lap qualifying session and then a 3 lap race. Points are awarded as follows in the **Support Car Championship**:

Position	Points
1st	10
2nd	9
3rd	8
4th	7
5th	6
6th	5
7th	4
8th	3
9th	2
10th	1

To unlock more support championships you need to gain a certain amount of **points in the previous support championships** as shown in the following table.

## Accumulated Support Car Championship Points

Points needed to unlock	Championship Name
0	Ford Fiesta
0	Van Diemen Formula Ford
30	Lister Storm
60	AC Superblower
90	Grinnal Scorpion
120	TVR Speed 12
150	Jaguar XJ220

Once you have completed all four races in the championship you are given the option of saving the game after you exit from the support car championship high score table.

## SINGLE RACE

**Players:** Select 1 or 2 players

**Laps:** Select the race duration

**Computer Cars:** Race with or without computer cars in 2 Player mode

**Qualify:** Qualify or start at back of grid

**Weather:** Choose between Default, Sunny, Cloudy, Rain, Foggy or Storm

In single race mode you can qualify if you wish, or skip qualification and start from the back of the grid for an extra challenge.

A single race can take place at any of the tracks you have unlocked in the game, including any of the special bonus tracks.

## **TIME TRIAL**

**Standard Time Trial:** This mode enables you to race around any of the tracks in the game.

After the first lap a ghost car of your fastest lap will appear, which will race around the track as a marker.

You are allowed to alter the weather conditions in this mode.

**Time Trial Challenge:** Similar to Challenge mode, players will be pitted against the clock. The aim is to complete as many laps as possible before the timer runs out. Extra time awarded by crossing the start line will decrease with each lap completed.

You can alter the weather conditions in this mode.

**2 Player Pursuit Mode:** This mode is a time-lag based race. 2 players race on the track at the same time. When the first player crosses a checkpoint then a countdown appears and the second player must cross this checkpoint before the countdown reaches 0. When one player fails to make a checkpoint then the other player is awarded a win.

You can alter the weather conditions in this mode as well as the time gap that is allowed between players crossing the checkpoints.

## **LINK-UP**

The link-up option allows you to connect two **PlayStation** consoles together in order to play with up to four people in one race. The game modes supported in link-up mode are:

**Challenge (2 Players)**

**Single Race (2-4 Players)**

**Championship (2 Players)**

**Time Trial (2 Players)**

The first **PlayStation** to enter link-up mode will be given all the main choices about game mode, weather and the number of laps. Once all the choices have been made, the race will begin.

Two copies of the game, one link cable, and two **PlayStations** are required for this option.

## **Test track**

The test track allows you to select one of eight unique routes around which you can race any car, and try out different car setups.

These routes are:

Short

Medium

Medium 2

Long

Dusty Road

Skid Pan

Runway

Oval

## GAME VIEWS

When racing, you can choose between five different views:

Behind Car (close)

Behind Car (far)

HeadCam™

Bonnet

Interior TV view

The HeadCam™ view allows you to experience racing a Touring Car from a driver's real view point. The forces that operate on a real driver are simulated as you rocket around the track.

## GAME OPTIONS

Selecting Game Options from the main menu takes you to the following menu:

**Sound Setup:** Alter the sound settings for the game

**Graphics Setup:** Alter the graphics settings for the game

**Controller Setup:** Configure your Controller

**Select Language:** Choose your language

## sound setup

The volume of the sound effects and music can be adjusted or turned off completely.

The Stereo SFX option should be selected as 'no' for sound output through non-stereo equipment. In a 2 player race, the sounds for each driver are played through different speakers. In a mono sound environment one player will not hear any sounds relevant to them if the game is in stereo mode.

The commentary can be set to 'on' or 'off' for championship mode.

## Graphics setup

**Split:** Toggle this option to determine which way the screen is separated in 2-Player mode.

**Wrong Way Message:** This can be set to 'on' or 'off' for a visual indication in game.

**Position Screen:** Select this option and you will be able to re-position the display on-screen with the Directional buttons.

**Dials:** This allows you to change the look of the on screen display within the game

## **Controller setup**

See pages 2-3 for instructions on how to re-configure the buttons, or use other Controllers.

## **Select Language**

Selects the language for in-game text and speech.

## **High scores**

Championship high scores  
Challenge high scores  
Standard TT high scores  
TT challenge high scores

## **TOCA Touring car Hall of Fame**

If you have access to the internet and you have a Time Trial time that you think is a world beater, then visit the Codemasters Web Site at:

<http://www.toca2.com>

There you will find the TOCA 2 Touring Cars Hall of Fame where you will be allowed to register your best times. In order to do this you will need the checksum which is shown underneath your time in the High Scores screens.

If your time is good enough it will then be displayed with the other best times for all to see - the ultimate Touring Car Championship achievement!

## INFORMATION

**Tracks:** Allows you to view all the tracks for the championship and gives help and advice on how to take the corners on each circuit.

**Cars:** Gives you the technical information of each make & model of car used for the championship.

**Drivers:** Shows the current 1998 season details of the drivers for each team.

## LOAD DATA

Allows you to load previously saved high scores and tracks unlocked in championship.

## SAVE DATA

Allows you to save high scores and tracks unlocked through progression in the championship.

## Secrets and cheats

Some of the secrets and cheats that are hidden in the game for you to find are:

### Battle Quick Play Mode

In this mode your car starts just in front of the normal track's start lines facing the wrong way down the track. The computer cars start at set points around the track (facing the correct way).

The aim is to race one lap around the track backwards avoiding the computer cars in the fastest time possible.

### **Bonus Tracks**

There are some extra hidden tracks which can be unlocked as you progress through the game, including tracks in Germany, the Alps and the USA.

### **Bonus Cars**

These cars can also be unlocked (see page 13 for full details) and include the TVR Speed 12, AC Superblower, Jaguar XJ220 and the Formula Ford.

## **performance driving guide**

### **The computer cars**

Racing against other drivers is probably the most difficult part of circuit racing, but here are a few handy hints to make sure that you don't always end up in the gravel trap.

When in traffic, try to hold your line without swerving, as it may only take one touch from another driver to send you skidding off the track. Try to learn each circuit and discover the best overtaking spots, slow corners are usually the best.

When braking heavily for a tight corner always have a quick look behind to see if another driver is trying to overtake. If so, take a more defensive line to protect your position.

## ***Basic driving tips***

The easiest way to overtake an opponent is to "out-brake"- him into a corner. (i.e. taking an inside line and braking later to get your nose in front). However, brake too late and you may find yourself off the track and losing places.

Always be patient when trying to overtake another driver. A rash overtaking manoeuvre may result in disaster so, if in doubt, stay behind and wait for a better opportunity.

Scrapes and barging is very much part of a Touring Car race but don't over do it as you may enrage another driver who may want revenge!

Some drivers are better than others so try to work out who the dangerous drivers are and give them a wide berth.

Use the racing line (See the information option in the game for a more detailed description)

Utilise the full width of the track, including the rumble strips.

Once you are used to the car and track, use manual gears to try to achieve a slight performance improvement.

Balance the accelerator through corners.

Correct any oversteer by steering into the direction of the skid.

**notes**
